Welcome to the Fourth Edition of the SustainEd Project Newsletter!

At SustainEd, we are committed to revolutionising sustainability education within higher education institutions. Our mission is to equip university students with the knowledge, skills, and competencies needed to actively participate in the green transition and contribute to the achievement of the Sustainable Development Goals (SDGs).

We aim to revolutionise higher education by developing an innovative learning program that integrates living labs and WebQuests. This will enhance students' understanding of sustainability and circular economy concepts, develop essential green skills, and prepare them for active participation in the green transition.

Equipping future leaders with essential green skills and knowledge

Featuring SustainEdG

A Practical Guide to Facilitating Dynamic Activities with WebQuests - Strategies, Tips, and Learnings

Hello again!

We're excited to share something we've been working on - a fresh new output from the SustainEd project: the SustainEdG.

It's more than just a guide; it's a hands-on tool to help educators design meaningful, real-world learning experiences that bring sustainability to life in the classroom and beyond.

What is SustainEdG ?

Whether you're starting from scratch or looking to enhance an existing course, SustainEdG offers step-by-step support.

-  View the guide online
-  Download the full PDF

SustainEdG is our latest open-access resource created for teachers, lecturers, and trainers who want to make learning active, engaging, and impactful.

It's built around two proven methods:

- **WebQuests** – digital, inquiry-based tasks that encourage critical thinking
- **Living Labs** – real-world, collaborative learning spaces

Together, these approaches help learners connect with real sustainability challenges - from climate action to circular economies - while developing practical skills and a problem-solving mindset.

What's Inside?

Inside SustainEdG, you'll find:

1. **Easy-to-follow guidance** on designing your own WebQuest or living lab
2. **Templates, checklists, and real examples** from across Europe
3. **Ideas** for adapting activities to your own context
4. **Tips** on involving students as co-creators of learning

It's written to be practical, flexible, and ready to use - whether you're in higher education, vocational training, or adult learning.

💡 *"Our goal? Make sustainability teaching feel less overwhelming — and a lot more doable."*

SustainEdG is the third and final core result of the SustainEd project, joining:

- 1 **SustainEdX:** The Sustainable Learning Experience Toolkit for HE Students
- 2 **SustainEdM:** Sustainable Learning Experience Teaching Manual
- 3 **SustainEdG:** A Guide to Designing Effective Educational Experiences

**Our Full
Toolkit is
Now
Complete!**

Together, these resources form a full toolkit for integrating sustainability across teaching, learning, and assessment.

📢 We'd Love to Hear From You!

*Have you started using SustainEdG or any of the other tools?
Do you have a classroom story to share? An idea for improvement?*

We're always looking to feature voices from the community in future newsletters, events, and updates.

✉️ **Drop us a message at info@sustain-ed.eu**

Thank you for being part of the SustainEd community. Your support, feedback, and energy have helped shape every tool we've created.

We hope SustainEdG inspires new ideas and brings more creativity, collaboration, and sustainability into your teaching.

Until next time,
The SustainEd Team
